

“Flying Saucer” Era May Be Back In U S

WASHINGTON, Monday (A.A.P.).—The “flying saucer” era may have returned to the United States.

At Yakima (Washington) yesterday, three men reported that on two occasions some hours apart they saw the “silvery moon-sized object,” which appeared to have flashing lights, floating low through air over the city.

They claimed it could not have been a weather balloon.

In Oregon (Portland) a resident says he saw a “big round object,” which was going west when it suddenly veered south-west in “an awful hurry.”

Meanwhile, at Atlanta (Georgia), two pilots, who at the week-end, claimed they saw a huge flame shooting Speed Gordon type of Skymaster while flying over Alabama, stoutly maintained to-day it was a “man-made gadget.”

Two other airline crews to report seeing “streaks of light”

port seeing streaks of light
during Friday night—near Black-
stone (Virginia) and Washington
(D.C.) respectively.
