

# U.S. Sees "Flying Saucers" Again

**NEW YORK, Monday (A.A.P.).—** A new "flying saucer" boom is sweeping America following reports by two U.S. pilots that on Saturday night they saw a plane resembling a "Speed Gordon" rocket-ship.

The pilots said the wingless two-deck plane they saw had "shooting red flares and a blue glow under the fuselage."

Yesterday hundreds of people at Yakima (Washington) telephoned the Civil Aeronautics Administration offices and reported that they had seen a "moon-sized blob" floating across the sky.

Two Civil Aeronautics Administration employees and a farmer, all from Yakima, also reported that they had seen a "moon-sized" object.

**They said it floated through the air over the city just after midday yesterday and again four hours later.**

**four hours later.**

One of the officials said: "It could not have been a balloon, because it was floating up wind, flying low, and seemed to have flashing lights like a fog light."

## **"In Awful Hurry"**

A resident of Portland (Oregon), reported yesterday that he had seen a "big round bright object going west."

"It suddenly veered southwest in an awful hurry," he said.

**"It bore no resemblance to a plane—it was just a roundish white disc."**

On the other side of the United States two other pilots reported having seen "streaks of light."

One pilot said that on Friday night when he was flying near Washington (District of Columbia) he saw the streaks.

The other said he was flying near Blackstone (Virginia) at the same time when he saw the streaks.

The two original pilots who saw the "Speed Gordon" plane on Saturday night over Alabama, stoutly maintain that it was a "man made object."

was a "man-made gadget."

They said it was jet-propelled and had two rows of windows, each about the size of ordinary house windows.

The pilots said they would fly along the route again this week, and would take still and movie cameras in case the mystery plane appeared again.
