

FLYING SAUCER ERA RETURNS TO U.S.?

YAKIMA (Washington), July 24.—The flying saucer era may have returned to the United States.

Two employees of the Civil Aeronautics Administration and a farmer reported today that they saw "silvery objects, the size of the moon, "floating through the air over the city just after mid-day and again at 4 p.m. (local time).

Each said that the object he saw could not have been a weather balloon, because it was floating up-wind. It was flying low and seemed to have flashing lights like fog lights.

In the meantime, at Atlanta (Georgia) the two pilots who claimed yesterday that they saw a huge flame-shooting "Speed Gordon" type of sky monster while they were flying over Alabama, stoutly maintained today that it was a "man-made gadget."

They described it as a wingless affair with a circumference four times that of the fuselage of a Superfortress. It was definitely

Superfortress. It was definitely jet-propelled, they said, and had two rows of windows, each about the size of ordinary house windows.

"BIG, ROUND, BRIGHT"

PORTLAND (Oregon), July 25.
—A Portland resident reported

today that he saw a big, round, bright object going west. It suddenly veered south-west "in an awful hurry." It bore no resemblance to an aircraft and seemed to be round like a disc.

Two other airline crews in the southern part of the United States now report that they saw "streaks of light" during Friday night.

The pilot of one aircraft said he was near Blackstone (Virginia) at the time and the pilot of the other said he was near Washington (DC). The times of the sightings indicate that all three crews may have seen the same thing, according to one pilot.

FROM ANOTHER PLANET?

LOS ANGELES, July 26.—Mr R. Dewitt Millett, author of "Forgotten Mysteries," told the United Press today that the

United Press today that the strange aircraft reported to have been sighted at Alabama on Saturday by two Allied pilots might have been a space ship from another planet.

He said: "Our scientists inform us that we may soon build space rockets, so why should not the beings on some other world beat us to it?"
