

## **FLYING SAUCERS SEEN NEAR BALAKLAVA**

---

Two Balaklava residents claim to have seen a flying saucer on similar phenomenon in the South-West sky on Tuesday about 5.15 p.m. They say the object appeared in the direction of Avon and lasted for a minute or so. It first appeared to be travelling away but later lost height and seemed to be approaching in the direction of Balaklava. A vapour trail or smoke trail was also visible it is claimed.

This statement follows other recent reports in this State of eerie lights and strange phenomena.

Readers of The News reported a green ball of light seen at 1.50 a.m. last Thursday and a Sandy Creek reader and a companion claim to have seen a ball of green light with a yellowish tail travelling at high speed in a North-westerly direction. On first appearance they thought it to be headlights of an approaching car. The time was 11.20 last Saturday night and both men claim to have been perfectly sober.

We are interested to know whether Tuesdays report can be substantiated by any other readers of The

listed by any other readers of the  
**Producer.**
