

A saucer with windows!

Australian Associated Press

MEMPHIS (Tennessee),
—A flying saucer with windows at the bottom and a blinking light on top flew over Arkansas last night at tremendous speed, two airline pilots reported today.

The US Air Force, which previously said it would have nothing more to do with flying saucers, sent Intelligence officers to interview Captain Jack Adams and First-Officer G. Anderson.

They will build a model of the strange craft and have it televised.

Adams said: "We firmly believe that the saucer we saw was a secret experimental aircraft—not a visitor from outer space.

from outer space.

"We are certain it was not
a meteor. It was an aircraft
in controlled flight."
