

Flying Saucer With Windows And Lights

MEMPHIS (Tennessee), Wed. (AAP).—A flying saucer with a window at the bottom and a blinking light on the top flew over Arkansas on Monday night at tremendous speed, two airline pilots claim.

The U.S. Air Force, which previously announced it would have nothing more to do with flying saucers, has sent Intelligence officers to interview Captain Jack Adams and First Officer G. Anderson, who have also been invited to appear on Mrs. Eleanor Roosevelt's television programme next Sunday.

Adams said to-day: "We firmly believe the flying saucer we saw was a secret* experimental type of aircraft, not a visitor from outer space. We are certain it was not a meteor. It was an aircraft in controlled flight.

aircraft in controlled flight.

"Circular Object"

"We were flying at 2000ft. when we noticed an intense blinking light about half a mile away. It was a circular object zooming along at 500 to 600 m.p.h. in a wide arc.

"It remained in view about 30 seconds.

"There were no navigation lights, but lights from eight or ten windows could plainly be seen on the lower side as it passed ahead of us."

Anderson said: "I had read about flying saucers. We were sceptical, as are most people. But what can you do but believe your eyes."
