

“FLYING SAUCER” IN CONTROLLED FLIGHT

MEMPHIS, Tennessee (A.A.P.).—A “flying saucer” with windows at the bottom and a blinking light on top flew over Arkansas on Monday night at a tremendous speed, two airline pilots reported on Tuesday.

THE United States Air Force, which previously announced that it would have nothing more to do with “flying saucers,” has sent intelligence officers to interview Captain Jack Adams and First-Officer G. And son.

Mrs. Eleanor Roosevelt has invited them to appear on her New York television programme on Sunday.

The pilots plan to build a model of the strange craft and have it televised.

Adams said: “We firmly believe the ‘flying saucer’ we saw was a secret experimental-type aircraft—not a visitor from outer space. We are certain it was not a meteor. It was an aircraft in controlled flight.

“They were flying at 2000ft. when they noticed an intense blinking light about half a mile away. It was a circular object, zooming along at from 500 to 600

zooming along at from 500 to 600 m.p.h. in a wide arc.

"It remained in view for about 30 seconds. There were no navigation lights, but lights from eight or ten windows could be seen on the lower side as it pass-

ed ahead. A strong blue-white light was flashing very rapidly on top.

"The object seemed to be about the size of a D.C.3 Dakota," said Adams. "There was no exhaust or vapour trail.

Anderson said he had read about "flying saucers." "We were as sceptical as most people, but what can you do but believe your eyes?"

In Formation

LISBON.—Scores of "flying saucers" were reported by Coast Guards off the north Portugal coast, flying in line and other formations.

Coast Guards said they were moving west "faster than tracer bullets."

A number of people in Oporto also claim to have seen fireballs."
