

# A Flying Saucer With Windows!

NEW YORK, Thursday.

At Memphis (Tennessee), on Tuesday night — a flying saucer with windows at the bottom and a blinking light on top flew over Arkansas at tremendous speed claimed two airline pilots yesterday.

The U.S. Air Force, which previously said it would have nothing more to do with flying saucers, sent Intelligence officers to interview Captain Jack Adams and First-Officer G. Anderson.

Adams said: "We firmly believe that the saucer we saw was a secret experimental aircraft, not a visitor from outer space.

"We are certain it was not a meteor. It was an aircraft in controlled flight."
