

# "Flying Saucer" Mystery In Arkansas

**MEMPHIS (Tennessee):** A flying saucer, with windows at the bottom and a blinking light on top, flew over Arkansas on Tuesday night at a tremendous speed, two airline pilots reported yesterday.

The United States Air Force, which previously announced it would have nothing more to do with flying saucers, sent intelligence officers to interview Captain Jack Adams and First Officer G. Anderson, and Mrs. Eleanor Roosevelt invited them to appear on her New York television programme next Sunday.

The pilots plan to build a model of the strange craft and have it televised.

Adams said: "We firmly believe in the flying saucer. We saw what was a secret experimental type of aircraft—not a visitor from the outer space. We are certain it was not a meteor. It was an aircraft in controlled flight.

"We were flying at 2000 ft. when we noticed an intense blinking light about half a mile away. It was a circular object zooming along at 500 to 600 miles an hour in a wide arc. It remained in view for about 30 seconds.

"There were no navigation lights, but the lights from eight or ten windows could be plainly seen on the lower side as it passed ahead of us.

"A strong blue and white light was flashing very rapidly on the top.

"The object seemed to be about the size of a DC3 Dakota. There was not any exhaust or vapour trail."

Anderson said: "I had read about flying saucers. We were as sceptical as most people, but what can you do but believe your eyes!"
