

Flying Saucer Reports

WASHINGTON, Monday (A.A.P.).—A veteran private pilot reported that he saw a flying saucer within 25 miles of Washington yesterday.

Bertram Totten, a clerk at the Congressional library, said that he was flying at 5000 feet when he sighted an aluminium colored disc about 40 feet wide, and 10 feet thick. It was whirling along 1000 feet below his plane.

Totten said: "I dived toward it but before I could get very close it zoomed up into space at several hundred miles an hour."

Vapour Trails

The saucer gave off vapour trails like those from aircraft engines, added Totten.

Captain Ali Beayouni, pilot of Egyptian Misr Airlines told in Cairo yesterday of three silver flying saucers which he saw on Saturday over the Mediterranean 35 miles south-west of Haifa.

He added that they were flying

He added that they were flying in perfect triangular formation at a great speed at a height of about 1200 feet.

"I was flying from Cairo to Beirut when suddenly the second pilot pointed to the west where I saw three metallic discs travelling at a staggering speed," he said.

He estimated that they were about the size of fighter aircraft.
