

Another Report Of Flying Saucer

NEW YORK, March 26. —

A veteran private pilot reported he saw a flying saucer within 25 miles of Washington today.

Bertram Totten, a clerk at the Congressional Library, said he was flying at 5000 ft when he sighted an aluminium coloured saucer 40 ft wide and 10 ft thick.

It was whirling along at 1000 ft below his plane.

Totten said: "I dived toward it, but before I could get very close it zoomed up into space at several hundred miles an hour."

The saucer gave off vapour trails like those from aircraft engines.
