

ANOTHER U.S. "SAUCER" SEEN

NEW YORK, Mon. (A.A.P.).
—A veteran private pilot today reported that he had seen a flying saucer within 25 miles of Washington.

The pilot, Bertram Totten, a clerk in the Congressional library, said he was flying at 5000ft. when he sighted an aluminium colored disc below him.

It was 40ft. wide and 10ft. thick, travelling about 1000ft. below his plane, he said.

"I dived towards it, but before I could get very close it zoomed up into space," he said.
