

MORE FLYING SAUCER REPORTS

LONDON, March 30.—Reuter's Rome office says flying saucers have been sighted over Italy five times in the last 24 hours, according to reports from different parts of the country.

At Salo, on Lake Garda, several people reported seeing a disc as large as a full moon streaking across the sky.

Other reports came from Carrara (four saucers); Catanzaro (one saucer heading west "like a moon with a wake of fire"); Cagliari (one saucer, that hung over the city for 20 seconds); Cal D'Aosta (one saucer).

Similar reports have also been received from Addis Ababa, Cyprus, Santiago (Chile), Bogota (Colombia), and Barranquilla (Northern Caribbean).
