

"Saucer" seen in N.Z.

Daily Telegraph Service

WELLINGTON (N.Z.),

Sun. — A Hawkes Bay farmer reported tonight that he had seen a flying saucer—the first reported in New Zealand.

The farmer, Mr. William Scott, stopped to clean his car windscreen while motor-ing alone near Waipukurau.

He looked up from the windscreen and saw a lu-minous object hurtle hori-zontally across the sky and disappear over the hills.

It was travelling at a tre-mendous speed.
