

REPORT OF SAUCER IN N.S.W.

Sydney.—A black flying saucer has been reported in NSW.

Four women residents of Lake Illawarra, on the South Coast, say that while fishing yesterday they saw a large, disc-shaped object, travelling at terrific speed, shoot round one of the mountains.

One of them, Mrs. C. Lehman, said: "The thing looked like a black disc. As it went round the mountain, it seemed to leave a trail of vapor behind it.

"I would say it was about 6 ft. to 9 ft. in diameter.

"As it travelled, I could see its shadow on the mountain-side. It didn't go straight, but zig-zagged about.

"After we watched it for about half an hour, it seemed to disappear suddenly into the side of the mountain."
