

Latest 'Saucer' Is Black

SYDNEY, Fri: A black "flying saucer" has been reported in New South Wales.

Four women residents of Lake Illawarra, on the South Coast, say that while fishing they saw yesterday a large, disc-shaped object, travelling at terrific speed, shoot around one of the mountains.

One woman, Mrs. C. Lehman, said: "The thing looked like a black disc. As it went around the mountain it seemed to leave a trail of vapour behind it.

"I would say it was about 6ft. to 9ft. in diameter. I could see its shadow on the mountainside. It zig-zagged about and it seemed to disappear suddenly into the side of the mountain."
