

"FLYING SAUCER" WAS LIKE ICE CREAM CONE

VANCOUVER, Thursday.

International airport officials here have reported seeing an object "about 200 feet long and shaped like an ice cream cone" flash over the airport at a tremendous speed on Tuesday.

They include the Airport Operations Superintendent F. V. Magar, who said that he had never seen anything like it before.

He added: "I've never turned on a report about flying saucers either."

Magar, who said that the object must have been doing at least 700 m.p.h., stated that he had checked with Air Traffic Control and had been informed that no aircraft was scheduled in the area at that time.
