

# Flying Saucer Hat Comes To Australia

**SYDNEY, May 17.**

Flying saucers are now going to women's heads.

When Sydney millinery firm executive Mrs. Selwyn stepped from a BCPA plane at Mascot tonight after a world tour, she was wearing a flying saucer hat with a Mone Lise veil.

The model is from a leading Paris house, and is one of the 30 models which she brought back with her for copying for her firm's spring collection.

Fashion notes Mrs. Waddell brought back include:—

- Every Paris woman walks with an umbrella.
- Every woman in New York is wearing a veil, mostly coarse-meshed and tight-fitting.
- Fur coats of some form or other are favored by most New York women, who wear them even on warm summer days.
- Paris dressing is very disappointing.
