

## OLD "FLYING SAUCER"

**Mr. G. Tilghman Richards, lecturer at South Kensington Science Museum, and designer of the Lee-Richards "Flying Saucer" annular monoplane, holds a model of the craft. "Flying Saucers" are no mystery to him. His plane was flown for 11,000 miles before the outbreak of the 1914-18 war and was the first really revolutionary aircraft to fly.**
