

U.S. Air Force 'Flying Saucers'

SAN ANTONIA (Texas),
Monday.

The United States Air Force unveiled its "flying saucers" yesterday, near the end of a spectacular aerial display at the Air Force base here.

One hundred thousand spectators were told to stand by for "top secret finale."

As a squadron of 'planes roared overhead, the announcer said the crowd was about to view real flying saucers.

The 'planes released mysterious objects. Spectators gasped, then laughed, as 30,000 paper plates came floating down.
