

Flying Saucer Or Venus?

MELBOURNE, May 26.

Capt. Gordon Savage, TAA senior pilot, who reported a "flying saucer" near Canberra early this morning, said tonight that he first thought it might be a Russian aircraft, but he is convinced now that the red and white alternating lights he saw were a phenomenon caused by the planet Venus rising on the horizon

CANBERRA, May 26.—Officials at Mount Stromlo Observatory said today that there was no bright star in the area described apart from Jupiter which could hardly be mistaken for a bright flashing light.
