

Four see "saucer"

ADELAIDE, Tues. —
Four men said today that they saw a flying saucer a week ago, but did not report this for fear of being ridiculed.

They said they saw the flying saucer near Mount Gambier.

Mr. J. A. Blackmore, of Kongorong, said he had just finished his lunch at the grazing property when he saw the flying saucer.

His companions, Cyril Blackmore and Lewis and Peter McQuade saw it also, he said.

Blackmore said the object was very high, made no noise, emitted no smoke or flame, and was travelling south-east.

It was in view for five or six seconds, and travelled

six seconds, and travelled
faster than any aeroplane he
had seen.
