

## Claim They Saw Flying Saucer

ADELAIDE, Wednesday. — Four men who did not report the matter for fear of being ridiculed, say they saw a flying saucer about 23 miles from Mt. Gambier a week ago.

Mr J. A. Blackmore, of Kongorong, saw a strange object in the sky which he thought was a flying saucer. Three companions, Cyril Blackmore and Lewis and Peter McQuade, saw it also.

Blackmore said the object was very high up, perhaps five or six miles, made no noise, emitted no smoke or flame and was travelling south-east. It was in his view for five or six seconds and travelled faster than any aeroplane he had seen. It was round, and had a white or aluminium color with a shiny surface.
