
“Saucers” now near Lismore

LISMORE. — An object claimed to be a flying saucer has been seen on four different occasions in the vicinity of Swan Bay, in the Lismore district.

The object was first sighted by Austin Sullivan, former anti-aircraft gunner, and Athol Livingstone, formerly of the RAAF, while travelling in a bus to Lismore.

Livingstone said it was a “shining object without shape, size or form.”

He added: “It seemed to be hovering about 20,000 feet up, then suddenly disappeared and made off at terrific speed.”

Livingstone said he had seen the object on three other days.

Sullivan said he saw the object about 8,000 feet up. It was about the size of a football and shone with a white light.

Others in the bus saw the object.
