

Arresting Pictures

FLYING SAUCER DEPICTED

Photos by Oregon Farmer

EXPERT'S REMARKS

New York, June 12.

Three pictures, purporting to show a flying saucer in action, were published to-day by New York's "Journal American." The photographs were taken by a farmer as the saucer went over his barn near Dayton in Oregon, the paper said.

One of the pictures depicted a dome-like object in the sky, another gave a close-up side view and the third showed the underside of the object. The pictures were captioned:—"Do Saucers Fly?" "Farmer's Photos answer "yes'."

In Indianapolis an aviation expert (Captain Eddie Rickenbacker) said that he believed flying saucers were real. "Too many good men, who do not have hallucinations, have seen them," he remarked, "and if they exist you can bet they belong to the United States Air Force. They are not from Mars or from Russia."
