

# Saucers DO Fly

NEW YORK, Mon (AAP): Three pictures purporting to show a flying saucer in action were published today by the New York Journal American.

The photographs were taken by a farmer as the saucer zipped over his barn, near Dayton, Oregon, the paper said.

One of the pictures depicted a domelike object in the sky, another gave a close-up side view and the third showed the underside of the object.

The pictures were captioned: "Do saucers fly? Farmer's photos answer 'Yes.'"

In Indianapolis, Indiana, aviation expert Captain Eddie Rickenbacker said that he believed flying saucers were real.

"Too many good men have seen them that don't have hallucinations," he said.

"And if they exist, you can bet they belong to the United States Air Force. They're not

... they belong to the United  
States Air Force. They're not  
from Mars or Russia."
