

Flying Saucer Over Geelong

Melbourne. — A former R. A. A. F. flying instructor (Fred Botts) claimed that he saw a flying saucer over Geelong yesterday.

He said the object was moving in a south-easterly direction at a speed of more than 1000 m. p. h. It was travelling at a terrific height and left behind a vapour-like trail.

"I had enough experience during the war and as a civilian pilot to know that it certainly wasn't a plane," he added.
