

FLYING SAUCER?

FARMER PAUL TRENT took these pictures (above and below) of a "flying saucer" which passed over his home in Oregon, U.S.A., last month. He said that the "saucer" was about 30 feet wide and was "both dark and silver" in color. He added: "There wasn't any flame and it was moving fairly slowly at first. Then it seemed to pick up speed suddenly and vanished."
