

## **Flying Saucer ?**

**Sir,—If "Smith" writes long enough he may possibly make us believe that his meteor seen in the sky on Tuesday evening is almost as real as the pot of gold we are supposed to find where the rainbow ends. No doubt he is a very learned and honourable**

**man, but I think that if it came to a battle of brains I would lean by a very small margin to the person who perfected the machine seen by me on Tuesday, with its perfectly prepared and controlled movements. — AGNES JACOBS, Legunia.**

**["Smith" replies: "Implied compliments, derogations and limitations duly acknowledged. The only thing lacking on either side, of course, is proof."—Editor, "The Examiner."]**
