

U.S. Air Force Seizes Flying Saucer Films

From Our Special Representative

NEW YORK, Oct. 6.

Nick Mariana, manager of a baseball team at Great Falls, Montana, took movie color photographs of two flying saucers which buzzed over the baseball park like silver discs.

They appear on his film for about three seconds.

US Air Force officers stepped in, however, and Mariana surrendered his films to the Air Technical Command at the request of the special investigators.

Mariana states that the Air Force officers cautioned him against giving any further information about the film.
