

Flying Saucer At Isle Of Man

London, Today: Six men saw what they claimed to be a flying saucer over Ramsay, Isle of Man, yesterday.

Men, engineering workers, were having their mid-morning break by an open factory door when they saw the object.

"It was a long narrow oblong with rounded corners," said one. "It had a clear-cut outline. Each end of the oblong was dark and solid looking but the centre seemed almost transparent."

Workmates confirmed his description.
