

SIX MEN SEE A FLYING SAUCER

LONDON, Sat (AAP): Six men saw what they claim was a flying saucer over Ramsay, Isle of Man, yesterday morning.

The men, engineering workers, were having their mid-morning break by an open factory door when they saw the object.

"It was a long, narrow oblong with rounded corners," one of the men said. "It had a clear-cut outline. Each end of the oblong was dark and solid-looking, but the centre seemed to be almost transparent."

His workmates confirmed his description.
