

6 CLAIM FLYING SAUCER

London, Sat: Six men saw what they claimed was a flying saucer over Ramsay, Isle of Man, yesterday morning.

All engineering workers, the men were having their mid-morning break by an open factory door when they saw the object.

"It was a long, narrow object, with rounded corners," one of the men said.

"Each end of the oblong was dark and solid looking, but the centre seemed to be almost transparent."

His workmates confirmed the story.
