

# Flying saucers back again

LONDON, Saturday.

**S**IX men say they saw a flying saucer over Ramsay, Isle of Man, this morning.

The men, engineering workers, were standing by the factory door when they saw the object.

"It was a long, narrow oblong, with rounded corners," one of the men said.

"It had a clear-cut outline and each end was dark and solid-looking. The centre seemed to be almost transparent."

The other men confirmed his story.—AAP.
