

"Flying Saucer" At Lucinda Point

According to reports from Lucinda Point, an object which may have been a "flying saucer" was seen over the wharf there at a recent date.

The strange object, said to have been semi-circular in shape, was spotted by waterside workers as they were loading a ship one day. A man in the hold of the ship saw the object overhead, high in the sky. In order to obtain a better view he went on deck.

Shortly afterwards it began to wobble and moved out to sea at a very fast rate, soon to be lost to sight.

"It seemed to travel faster than a bullet" said the watersider.
