

"Flying Saucer" Had Tail of Flame

LONDON, November 27.—A "flying saucer" with a tail of flame ending in black smoke was seen at 4 p.m. on Saturday by two airmen flying over Selsey Bill (Sussex) to Ryde (Isle of Wight).

Pilot David Pince, of Worthingite, Sussex, said that when it was about half a mile from them the saucer turned on its edge.

It had the appearance of a metal disc.

Then it shot upwards, and disappeared in the clouds.
