

## From Fantasy To Flight

**F**ROM THE WORLD of fantasy comes this "flying saucer" and the bizarre hat worn by 19-year-old dental mechanic Arthur Sanger, of Southampton. The "saucer" is the latest of 200 miniature planes built by Arthur and it took him three months to complete. It is powered by a Jetex rocket motor, flies for 30 seconds at heights up to 100ft., and has four rudders. Arthur's aim is to build bigger and better "flying saucers."
