

# **Described meteor as "saucer"**

Sydney, Friday. — The mystery of the "flying saucer" reported to have been seen by more than a dozen people in two States on Wednesday night was cleared up in Sydney today.

The Government Astronomer (Mr. Harley Wood) said it was a meteor.

**"In fact, two of the descriptions we had of the saucer were the best we have ever had of a meteor," said Mr. Wood.**

The "flying saucer" was seen about 7 p.m. on Wednesday by people in Brisbane (Qld), Glen Innes and Gladstone (NSW), and a man in Homebush (a Sydney suburb).

They said it was a brilliant light travelling at a terrific rate across the sky.
