

"FLYING SAUCER" AT GLEN INNES

GLEN INNES: Two Glen Innes men fishing on the Beardy River, four miles from Glen Innes, on Wednesday night, stated yesterday morning that they had seen a "flying saucer".

The men, A. Pennington and L. Carter, claim they saw an object with two large green lights in front of it travelling toward the coast.

Carter, who saw the object for about ten seconds, says it was travelling in a straight line at a very high rate of speed.

Pennington, who saw the object as it disappeared toward the coast, claims it travelled many times faster than a jet fighter.
