

THAT SAUCER !

Sir,—I wish to draw your attention to the flying saucer, or whatever you wish to term it, which was seen by Murwillumbah people last week. With several other people in Brunswick Heads, I saw the same object, which was travelling from Byron Bay towards Mullumbimby in a straight line, fairly high, and at a fairly high speed. Many critics believe that these things are only seen by people who have had a night out, etc., but I can assure you that, in this case, everything was above board.

Two years ago three persons were standing in front of a store here talking, when a rushing sound was heard in the sky. The people looked up, and saw a bright object travelling at terrific speed across the sky. The people were scared, and asked one another what it was. Before anybody could answer, the object burst with a terrific noise and lit up the whole sky. Needless to say, all conversation was finished as the remark was made to me afterwards that they thought the end of the world was at hand. I never made mention of the last phenomenon before as the wise people would only start a paper argument. I notice the direction of the object seen in Murwillumbah was the reverse seen here.
