

## **"Flying Saucer" Seen Over Township**

**BRISBANE, December 6.**

Residents of Maryborough, about 200 miles north of Brisbane, tonight watched what they described as "a flying saucer making a wide sweep over the district."

About 8 p.m., a "bright blue object" was seen travelling at a high speed to the north and returning at a low level.

The Maryborough RFL sub-branch president (Mr. S. Bryant-Smith) said he estimated its speed at 400 to 500 m.p.h.
