

## **WOT! MORE SAUCERS**

---

**BRISBANE, Wed.**

Residents of Maryborough, about 200 miles north of Brisbane, tonight watched a "flying saucer" take a wide sweep over the district.

About 8 p.m. a bright blue object was seen travelling at high speed to the north and it returned at a low level approaching the river mouth.

The object moved almost perpendicularly to an estimated height of 8,000 feet. The Maryborough RSL sub-branch president, Mr S. Bryant Smith, said he estimated the speed at 400 to 500 m.p.h.
