

SAW FLYING SAUCERS?

SYDNEY, Wed. — Mr. Fred Sault (59), of Concord, thinks he saw a "flying saucer" to-night.

Mr. Sault said he saw "a brilliant, disc-like object" flash across the sky and disappear in a northerly direction.

"It was bright blue and had no tail," said Mr. Sault, who added: "I have seen plenty of falling stars and meteors, but this was something I had never seen before. I watched it for three or four seconds before it disappeared.

"It looked like a flying saucer because it had a disc-like shape."

Neither the Civil Aviation control authorities at Mascot, the Sydney Weather Bureau nor the Riverview College observatory had any inquiries about "flying saucers" or meteors to-night.
