

## ITALIANS SEE AIR "SAUCER"

LONDON, December 13.—Several Italian Air Force officers claimed to have seen a "flying saucer" over the Bay of Naples last night, according to Press reports here, says Reuter.

One officer, Captain Alfredo Stella, was reported by Momento Sera as having said that he saw a brightly luminous oval shape about 20 yards in diameter flying fast at about 6,000 feet.

It suddenly veered right and vanished.
