

Flying Saucers Again

REPORTS FROM ITALY

London, Dec. 12.—Several Italian Air Force officers claimed to have seen a "flying saucer" over the Bay of Naples last night, according to press reports here to-day.

One officer, Captain Alfredo Stella was reported by "Momento Sera" as having said that he saw a brightly luminous oval shape about 20 yards in diameter flying fast at about 6000 ft. It suddenly veered to the right and vanished.
