

Flying Saucers

Sir,—Having read in "The Examiner" of a "flying saucer" being seen by members of the Wynyard Aero Club on Sunday, I would like to mention that while sitting on my verandah and looking towards Mt. Barrow about 4 p.m. on Christmas Day I saw

two very bright objects in the sky. They looked like shining balls of fire. They followed one another and disappeared in a few seconds.

They were very like rockets going up and were very bright. My wife thought they may have been weather balloons. I do not know whether anyone else saw these objects.—ARTHUR C. MURRAY, Horne Ct., Invermay.
