

## Flying Saucer

### KALGOORLIE RESIDENT'S REPORT

A resident of Kalgoorlie rang radio station 6KG yesterday morning and reported that she had seen a flying saucer travelling at a height of about 1000 feet.

This claim was made by Mrs. Mitting, of Edgar street, South Kalgoorlie who left the following signed statement at the station:—

"While resting on my verandah bed on Saturday afternoon, at about 3 o'clock, I noticed a white object coming out of some clouds. On going outside I watched this object floating along in the air. It was round and as big as a tea plate. I was about to get one of my neighbours to come out and have a look at it, when it disappeared into the clouds again. I do not know if anyone else has reported, but people to whom I spoke about it say it was a flying saucer."

Mrs. Mitting stated that the object was moving along in circles, and looked very beautiful.

(Inquiries at the meteorological station at the aerodrome revealed that a radio sonde balloon was re-

that a radio sonde balloon was released about 2.45 p.m. on Saturday, and it is thought that this is what Mrs. Mitting may have seen —Ed.)
