

## **FLYING-SAUCER DEATH**

The death of an American fighter pilot who pursued a monster flying disk intercepted over Godman air base, Kentucky, on January 7, 1948, was one of the many incidents examined by Gerald Heard, special investigator of the London "Sunday Express."

What happened to the pilot (Capt. Mantell) and the unusual damage done to his fighter plane, is told in Mr. Heard's remarkable report to be published in "The Western Mail," beginning on January 25.
