

# FLYING SAUCER SECRET DISCLOSED BY U.S.

NEW YORK, Tuesday (AAP). — The secret of “flying saucers” sighted in the past three and a half years has been disclosed by the United States navy.

The “saucers” were huge new plastic balloons used in cosmic ray studies.

This explanation is given to the New York “Times” by Dr. Urner Liddel, chief of the nuclear physics branch, Naval Research Office, Washington.

Dr. Liddel said there was no longer any need for secrecy on a scientific basis.

He added: “Certainly there is no longer any need to keep the public in the dark about what flying saucers really are”.

Dr. Liddel pointed out that special strong balloons nicknamed “skyhooks” were released at many points in the United States and were free to travel unlimited distances.
