

"FLYING SAUCER" METEORITES

An explanation of the visitors from space—flying saucers—has been put forward by Dr. J. Gentilli, of the University of W.A.

In two articles, the first of which is published in "The Western Mail" today, he has related the cases put forward by Mr. Gerald Heard in his recent series of articles on flying saucers to well-known astral phenomena. Dr. Gentilli supports his explanation with sketches of meteorites.

In the same issue is another long instalment of Nevil Shute's book "Round the Bend." There are two short stories and several illustrated fashion articles. Two pages of "News Dictionary" offer interesting background information on the world's news.

Boy Killed: Glen Ball (16), of New Lambton, a suburb of Newcastle, New South Wales, was killed instantly on Monday night when his bicycle and a utility truck collided at Broadmeadow.
